*The Science of Dentistry in the Hands of an Artist Enhances Lives Through Smiles*

Your smile is one of your most important assets. It conveys warmth, energy and a positive attitude. Having a beautiful, healthy smile not only helps you look better, it can help you feel more confident as well. At daVinci Smiles, a dedicated team of professionals will help you explore the possibilities of discovering a new you through Aesthetic and Reconstructive Dentistry.

Dr. Motlagh's perfectionist personality, along with her passion, experience and her high level of education makes her one-of-a-kind in her profession. Dr. Motlagh believes in spending extra time educating her patients, to enable each person to make an educated decision about their treatment.

Today's Cosmetic Dentistry goes beyond tooth whitening, white fillings and white crowns. When it

Dr. Motlagh excels at visualizing and creating the most perfect, natural-looking smile for you. Visit her gallery of smiles at [www.davincismiles.us](http://www.davincismiles.us)

comes to transforming and creating a younger look through a smile makeover, only a few have mastered the art of creating a perfect natural smile customized for you. During a complimentary consultation, patients discuss with Dr. Motlagh what they don't like about their smile. They review a variety of Dr. Motlagh's smile makeover cases as well as seeing their own smile digitally redesigned to a natural-looking and functional smile that matches the anatomy and naturally enhances their face. This computer technology enables the patient to visualize the outcome before proceeding with decisions about treatment. In addition, Dr. Motlagh fabricates temporary restorations or a "blueprint" to test speech ability and the look of the smile before finalizing the smile makeover.

"I encourage people to get involved in their smile makeover treatment to help me and my master ceramic technician create their dream smile. I believe that is why we achieve such impeccable results and happy clients. My team and I truly feel blessed for the ability to change people's lives by bringing a nice smile to their face." says Dr. Motlagh.

Another important component of Dr. Motlagh's treatment philosophy lies in her comprehensive approach to dentistry as a Neuromuscular Dentist. Through a comprehensive head & neck examination, she measures and analyses factors such as bite and teeth alignment, the health and function of the facial muscles and Temporomandibular Joints (TMJ) using Myotronic instrumentation and computerized bite analysis techniques. Using this information, she determines the most relaxed, ideal position of the muscles, teeth and joints. With this more balanced occlusion, grinding, the most common cause of tooth wear can be corrected and

restoration procedures such as veneers will last longer. In addition, facial muscles can then relax, leading to a reduction in fine lines and wrinkles, a "non-surgical face lift," as well as relieving tension headaches and TMJ pain.

Dr. Motlagh's staff at daVinci Smiles consists of friendly, experienced professionals, passionate about providing full service treatment in a comfortable, spa-like setting. "We are not a typical dental office," Dr. Motlagh notes. "We call our patients guests and treat them like they are guests in our home. I believe in pampering and my staff is trained to make each guest's visit as comfortable as possible. Your dental appointment takes place on heated dental massage chairs with warm blankets, warm scented facial towels, relaxing music or your favorite DVD. In many cases, we even send a town car to pick up our guests so they don't have to drive on their smile makeover day."

An honor graduate of Tigard High School, Dr. Motlagh received honors from Lewis & Clark College and OHSU School of Dentistry. She completed her post doctorate studies at The Seattle Institute of Advanced Dental Studies before attending the highly regarded Las Vegas Institute for Advanced Dental Studies in Cosmetic and Neuromuscular Dentistry. Dr. Motlagh is a certified member of The Academy of Laser Dentistry and an active member of the reputable Academy of Cosmetic Dentistry, American Dental Association, Oregon Dental Association and Northwest Neuromuscular Study Club.

When you are ready to enjoy a more youthful, confident look, call to schedule a complimentary cosmetic consultation with the daVinci team. You might decide to enhance your most important asset—your healthy, dazzling smile!
